INSTRUCTIONS

"SPEEENUT" can be used with or without the constant adjustment feature, which is controlled by the CONSTANT ADJUSTMENT LEVER. To connect or disconnect the CONSTANT ADJUSTMENT FEATURE, simply turn lever to the RIGHT and press HANDLE PIN up or down to engage or disengage with NOTCH in LEVER as required. YOU'LL LIKE IT.

"SPEEDNUT" IS SIMPLE AND FOOL-PROOF

IT IS IN A CLASS OF ITS OWN

Always in repair and ready for use. Has no complicated parts to get out of order. The mechanism for opening and closing the jaws permits it to be ratcheted rapidly, as NEW GRIP is secured INSTANTLY on nut without removing the wrench. Its tight grip prevents slipping and wearing off corners of nuts.

BUY ONE OF THESE WRENCHES

You wil use it more than all your other tools combined. No matter how many wrenches or how few, you're wasting time without a "SPEEDNUT."
